

Today, all your local roundings and excess fat can be removed softly once and for all

This ultrasophisticated method offers the following advantages :

- little to no leave of absence
- painless and short treatment of 1,5 up to 2 hours, with local anaesthetic
- a final result
- safety and comfort

(Soft) liposculpture allows the excess fat to be drained off by means of small tubes.

Liposculpture is an excellent method to shape the contours of your hips, thighs, belly, double chin, knees, arms and calves. It is a technique for both young and old as the skin pulls together nicely.

After the treatment, the patient can return home immediately. However, after the surgery, he/she needs to wear a kind of stocking during 3 weeks in order to have the swelling disappeared rapidly. Moreover, it is possible to fill up your wrinkles with your body's own fat.

Treatments

- The price for one treatment per location is € 1,450
- If more than one spot is treated in the same day, it is another € 725 for each next location.
- The surgeries are performed by certified doctors and surgeons having an experience of many years in the field of the liposculpture technique.
- Make an appointment, free of engagement, with one of our doctors.
- The first consultation costs € 35. These costs will be reimbursed when you decide to be treated in our lipo clinic.
- Appointments can be made by telephone, on working days from 10.00 until 17.00.
